

Velora Studio

Build Summary — What We Made

WhatsApp AI Product Studio for Indian merchants

Date: 11 July 2026

Deploy: <https://velora-studio-six.vercel.app>

1. Business Idea

Velora Studio helps Indian shop owners turn a phone product photo into professional studio shots and social ads — entirely on WhatsApp, without Canva, Photoshop, or a designer.

One-liner: B2B WhatsApp SaaS for Indian merchants — send a product photo !' get catalog-ready images + marketing posts !' pay with credits/plans.

Who it is for

- Kirana / dry fruits / cosmetics / fashion / local D2C sellers
- Merchants who live on WhatsApp and need premium-looking photos fast
- Languages: Hinglish, Hindi, English

What you sell

- Studio Shot — clean product photo for catalog / WhatsApp / marketplace
- Social Ad Post — ready-to-post marketing creative (headline, offer, CTA)
- Monetization — free trials !' credits !' Razorpay subscription plans

2. What We Built

A. WhatsApp Bot

- Welcome + language selection
- Photo upload !' Studio shot or Social ad
- Credits, balance, plans, paywall (Razorpay)
- Stuck-generation recovery (cancel / auto-unlock)
- Progressive image delivery (A !' B !' C one by one)

B. Studio Shot

Creative director flow:

- 1. Merchant sends product photo
- 2. GPT-4o Vision analyzes the photo
- 3. Style list (AI Recommended + category styles + Transparent PNG)
- 4. Optional angle !' lighting !' quality
- 5. Generate 3 variations
- 6. Post-actions: Regenerate / Another style / Enhance / Create ad / Done

Studio intelligence: main-product detection from messy photos, photo issues, product-matched scenes, framing (~40% product in frame), isolate-first cutout when needed.

Studio Engine: catalog (white packshot) and ad (GPT-4o vibe !' Photoroom). Connected to WhatsApp + POST /api/process-studio-request. Optional Express engine in /studio-engine.

C. Social Ad Post

- Ad interview flow (style, purpose, offer, CTA, headline, message, background)
- Canva-style 1080×1080 composites
- 6 themes: luxury, minimal, festival, grocery, fashion, electronics

- Google Fonts + Fabric.js / Sharp + brand color extraction

D. Platform

- Next.js on Vercel · Supabase · Photoroom · OpenAI · Meta WhatsApp · Razorpay

3. How Studio Shot Works Now

Photo !' GPT-4o Vision analysis !' user picks style/angle/lighting/quality !' Studio Engine (catalog or 3× ad vibes) !' Photoroom model v3 !' WhatsApp receives variations !' 1 studio credit for the set.

Reliability fixes

- Webhook maxDuration up to 300s
- Progressive delivery
- Stuck generating session recovery
- Photoroom fixes (invalid textRemoval removed; no AI background + shadow conflict)

4. Tech Stack

- App: Next.js 16 (App Router) on Vercel
- Bot: WhatsApp Cloud API
- DB: Supabase
- Image AI: Photoroom Image Editing API
- Language/Vision: OpenAI GPT-4o (studio) / GPT-4o-mini (ads helpers)
- Ads canvas: Fabric.js + Sharp + Google Fonts
- Payments: Razorpay
- Optional engine: Express (studio-engine/)

5. Key Modules

Studio

studio-analysis.ts · studio-scene-prompts.ts · studio-engine-core.ts · studio-generation.ts · studio-whatsapp.ts · studio-options.ts

Ads

ad-whatsapp.ts · ad-composite.ts · ad-templates.ts · ad-brief.ts · ad-colors.ts

Shared

whatsapp-handler.ts · photoroom.ts · conversation.ts · paywall.ts · users.ts

6. Current Status

Done

- Full WhatsApp Studio + Ad loops
- Credits / plans / paywall
- Studio quality upgrades + gpt-4o
- Studio Engine connected to WhatsApp
- Timeout + stuck-session handling
- Photoroom generation failure fixes

Active stage

Polish Studio quality until merchants would pay for it.

Biggest remaining limiter

PHOTOROOM_MODE=sandbox !' watermarked previews. Production Photoroom key unlocks sellable output.

Not built yet

- Referrals · Analytics dashboard · Merchant web dashboard
- Packaging dieline !' 3D mockup (dropped earlier)

7. What We Taught GPT (Studio)

- Analyze raw photo: main product, issues, usability, ideal setting
- Write photoshoot prompts: surface, visible props, detailed background, lighting, shadow
- Product ~35–40% of frame — not full-bleed
- Catalog vs Ad branching in Studio Engine
- Sharp packaging, no hands, realistic commercial look

GPT = creative director. Photoroom = camera studio.

8. Next Recommended Steps

- 1. Redeploy latest fixes and retest Studio generation
- 2. Switch to PHOTOROOM_MODE=production with live Plus key
- 3. Collect 10–20 real merchant photos and tune prompts
- 4. Soft launch to first sellers
- 5. Later: analytics, referrals, merchant dashboard

9. Summary Verdict

Velora Studio is a working WhatsApp-native product photography + ad creation SaaS for Indian merchants. Core loops are live. Current work is Studio quality, reliability, and production Photoroom before serious go-to-market.

Document generated for Aurix / Velora Studio project status.
